# **LEOPARD 46 POWERCAT**

*arrives in Australia  
for 2022*

The long-awaited release of the brand-new Leopard 46 Powercat has finally been announced. Aussie multihull powerboat enthusiasts will get their first opportunity to view this all-new model when the first boats arrive in Australia for the Sanctuary Cove International Boat Show May 19-22, 2022

Taking her looks and unmistakable pedigree directly from her beautiful big sister the Leopard 53 Powercat, The Leopard 46 Powercat is set to break new sales records, with a perfect combination of styling, performance, comfort and robust construction. This stunning new model is the end result of almost 30 years of accumulated design experience, as well as an injection of totally new thinking.

The new Leopard 46 Powercat offers total luxury, massive outdoor living spaces, and class leading home-away-from-home accommodations all wrapped in an ultra-modern package.

The Leopard 46 Powercat comes in a three or four-cabin layout. The three-cabin owner's suite boasts a large walk-in closet, desk, and a double vanity. Forward VIP guest cabins offer spacious, island berths and ensuite heads. Accommodations have been enhanced to make you feel at-home with new soft furnishings, very comfortable beds and great use of space.

The Leopard 46 Powercat, taking hints from her big sister the L53PC shows the external styling is a breakaway from existing design language. It features a more powerboat-orientated style, simple, clean, and elegant lines. Her hull profile features a full length rectangular shaped window to allow different opening portlight configurations. Saloon windows are flat toughened glass for optimum optical clarity.

Internally, with new matt beige finish on galley locker doors and some countertops (in place of gloss white). New integrated splashback around galley worktop, more indirect lighting with the lighting 'temperature' consistent throughout boat. She features plush new soft furnishing for the settees.

On the main level, large, retractable sliding glass doors leading from the aft cockpit to the galley fuse indoor and outdoor entertainment. The saloon offers an L-shaped lounge to port and a two-person settee to starboard. Cruising pleasure is amplified with the option to add an interior navigation station. The flow is seamless with access to the foredeck through the forward saloon door.

The full width galley features the very latest in appliances, full size domestic style refrigeration, optional dishwasher, and additional refrigeration, and contains storage lockers for cutlery/crockery/food, incorporated drinks locker, and space for optional undercounter icemaker or wine cooler. Generous countertops allow for easy food preparation.

The Leopard 46 Powercat cabins feature increased floor space, and wide, comfortable, beds, now accessible from the side. Plenty of head height, generous bathrooms with high end tapware and accessories give the accommodation areas a feel of space, light and comfort. Recessed lighting has again been used in the cabins to create a soft, overall lighting, further enhancing the luxury feel of these spaces.

Outdoor minded Aussies will love the huge flybridge, with comfortable helm station, offering excellent visibility while underway and docking. This area is the heart of the Leopard 46 Powercat, covered by a fixed solid hardtop with the helm located to starboard. The spacious seating provides panoramic views and

side and bow rails for enhanced safety. All hatches are mounted flush in the deck, making for easy and safe movement around the vessel while underway.

And like the Leopard 53PC, the Leopard 46 PC engine rooms are completely sealed off from the living spaces. They are located aft of the rear cabins and accessed via large deck hatches on either side of the cockpit. They are fitted with step ladders to aid entry to these generous spaces for routine maintenance, and to access the vessels electrical systems to starboard, and her plumbing systems to port. A clever feature which will please owners and technicians. This configuration means that engine noise is substantially reduced in the accommodation areas, and that engine room odours are eliminated.

The Leopard 46 Powercat is not just a replacement of the very popular L43 PC, but an evolutionary change in the Leopard Powercat range. This completely new boat is designed to please the existing Leopard owners and Leopard fans, but also to appeal to the more traditional motor yacht market with a modern, reimagined interior that offers the comforts of home as well as plenty of outdoor entertaining space. Combining this with the smart and economical advantages of catamaran design, she is easy to maintain

and operate, and is up to 50% more fuel efficient than her monohull motoryacht counterparts. The Leopard 46 Powercat is the best of both worlds.

The Leopard 46 Powercat design maintains the hulls' narrow entry at the bows with big-volume stepped hulls above the waterline resulting in incredible space down below as well as unmatched range at cruising speed. With a maximum range of 2000 miles, no other type of motor yacht can compete. She reaches a maximum speed of 24kts, with a cruising speed of 17.5kts.

the perfect place to entertain. This area is configured with spacious settees, and an entertainment area with barbecue, sink and refrigeration, perfect for entertaining family and friends. And they will love the huge cockpit featuring large table, and seating for eight or more, just a step away from the galley. A large sunbed forward on the main deck offers another area to relax and enjoy the views.

Another key feature is the accessibility around the vessel, with wide flat side and foredecks, access direct from the saloon forward to the foredeck, high

With the space, stability, and efficiency offered in a catamaran, combined with the comfort and luxury of a motor yacht, she is crafted with style without compromising on performance.

Offered in a three or four cabin layout, with the option for separate crew cabins. The three-cabin owner's version provides an at-home feel with a large, walk around bed, a walk-in cupboard and a double vanity.

Big sister to the 46, Leopard 53.

This model is offered with an extensive range of retail Options, just some of which are listed here;

- Upgrade to 320hp or 370hp Yanmar engines.
- Bow Thruster

# FLEXITEEK

## AUSTRALIA

**A guarantee that expresses the ultimate confidence in our product. Flexiteek decks need minimum maintenance, leaving you more time to enjoy boating.**

\*Most asked question at the 2021 Sanctuary Cove Boat Show

**Q: How long will a Flexiteek deck last?**

**A:** Not known, because in the 21 years Flexiteek Australia has been installing Flexiteek decks, NOT ONE has been returned to us for replacement.

**0412 880 718 | [www.flexiteekaustralia.com.au](http://www.flexiteekaustralia.com.au)**

*There is no deck so small, so large or so complicated that flexiteek cannot provide a meticulously fitted, fashionable solution. Flexiteek 2 G was developed to reduce thermal transfer in hot climates like Australia and it won't weigh your boat down – it's only 4.6 kg per square metre.*
